IDisposable

- * .NET používá GC pro správu paměti
 - * Generace
- * Paměť je třeba (občas) pročistit
- * Unmanaged zdroje
 - * Non-memory zdroje
- * Finalizace
- * <https://msdn.microsoft.com/en-us/library/b1yfk5e%28v=vs.110%29.aspx>

IDisposable

```
namespace System
{
    //
    // Summary:
    //     Provides a mechanism for releasing unmanaged resources.To browse the .NET Framework
    //     source code for this type, see the Reference Source.
    public interface IDisposable
    {
        //
        // Summary:
        //     Performs application-defined tasks associated with freeing, releasing, or resetting
        //     unmanaged resources.
        void Dispose();
    }
}
```

Demo

Q & A
